No Comments

Copenhagen scheme ties together public transport and car club

a. Journeys

- Door-to-door journeys
- Use cases

b. Lifestyles

- New mobility lifestyles – not just carsharing
- MaaS

Why is integration as good thing?

Outcomes & impacts

- ...associated with a reduction in inefficient use of private cars
- Reduce air pollution, liberate street space, promote more active travel, support transport services viability & hence fairness
- Liberté, égalité, fraternité (?)

2. What is Integration?

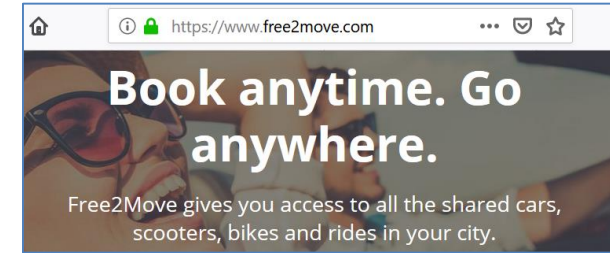

🔄 Aggregation between carsharing operators
Simplification for “normal” users

🔄 Aggregation / bundling of car sharing with e.g. bike share
Locally relevant mobility side-by-side

🔄 Integration of carsharing into public transport

- Car sharing as a part of public transport
- Door-to-door journeys

🔄 Integration of carsharing into mobility
Enables new mobility lifestyles

Integration of carsharing into mobility...

Whim covers all your journeys

How it works

- Public transport
- Taxi
- Car
- City Bike

The image shows a smartphone displaying the HSL Mobilierkiet app interface, showing a ticket and time remaining. The app interface includes a back arrow, the title "HSL Mobilierkiet", a status "Valid until 17:14", and an information icon. Below the status, it says "Time remaining".

2. What is Integration?

🔄 Aggregation between carsharing operators
Simplification for “normal” users

🔄 Aggregation / bundling of car sharing with e.g. bike share
Locally relevant mobility side-by-side

🔄 Integration of carsharing into public transport

- Car sharing as a part of public transport
- Door-to-door journeys

🔄 Integration of carsharing into mobility
Enables new mobility lifestyles

🔄 Brokerage and marketplace?

Integration of car sharing into public transport

1.Co-location of services

- 🔄 Cars at stations & bus stops
- 🔄 Visible
- 🔄 Associated services
- 🔄 Mobility hubs

1.Payment/ticketing

- 🔄 Integrated ticketing & accounts – the road to MaaS
- 🔄 Linked offers

1.Co-marketing

1.Information

| | Monday-Friday | | Saturday | | Sunday | |
|-----|---------------|------|----------|------|--------|-----|
| | TRAIN | BUS | TRAIN | BUS | TRAIN | BUS |
| 6am | 6:55 | | | | | |
| 7am | | 7:27 | 7:02 | | | |
| 8am | 8:01 | 8:00 | 8:01 | 8:00 | | |
| | | 8:50 | | 8:50 | | |
| 9am | | 9:42 | 9:43 | 9:42 | | |

1.Co-location of services

e.g. Groningen, Roden, NL
(courtesy Frans Hamstra)

**Parking
+ Carpool**

Bicycle storage

Bicycle lockers

Carsharing

Charging

Watertappunt

Kiosk

Toilet

Wifi

Fitness

Restaurant

Pakketmuur

What does integration involve?

1.Co-location of services

1.Payment/ticketing

- 🌐 Integrated ticketing & accounts – the road to MaaS
- 🌐 Linked offers

Member employees with an Annual MCard can benefit from joining the Enterprise Car Club for personal use at just £1 a year (saving £59 annually).

1.Information

Examples in the UK

PT integration

- WYCA
- Nottingham
- Norwich
- Reading
- Not London
- Exeter

Developing Car Clubs in England Programme

Examples in the UK

travel smarter in **Reading**

- Smartcard to unlock car share, bike share and bus travel
- Incentives App for sustainable multimodal travel
- Joint registration/website
- Smartphones “Betterpoints”
- A **Reading buses** app for customers

Examples in the UK

NEWS

This app reckons it can transform your commute forever

Finnish company making its first overseas launch in the West Midlands

Commuter access various modes of transport in a single app for either a set monthly fee ranging from £99 to £349 or on a pay-as-you-go basis.

It has been launched in association with [Transport for West Midlands](#) (TfWM), [National Express](#), Gett, Enterprise Rent-A-Car, nextbike and other transport providers.

And will work with TfWM's existing Swift card.

reserve, jump in, drive away

Sometimes you just need a car. Odd thing for a train company to say, don't you think? It's true, though. We're good, but we can't take you directly to every address in the country.

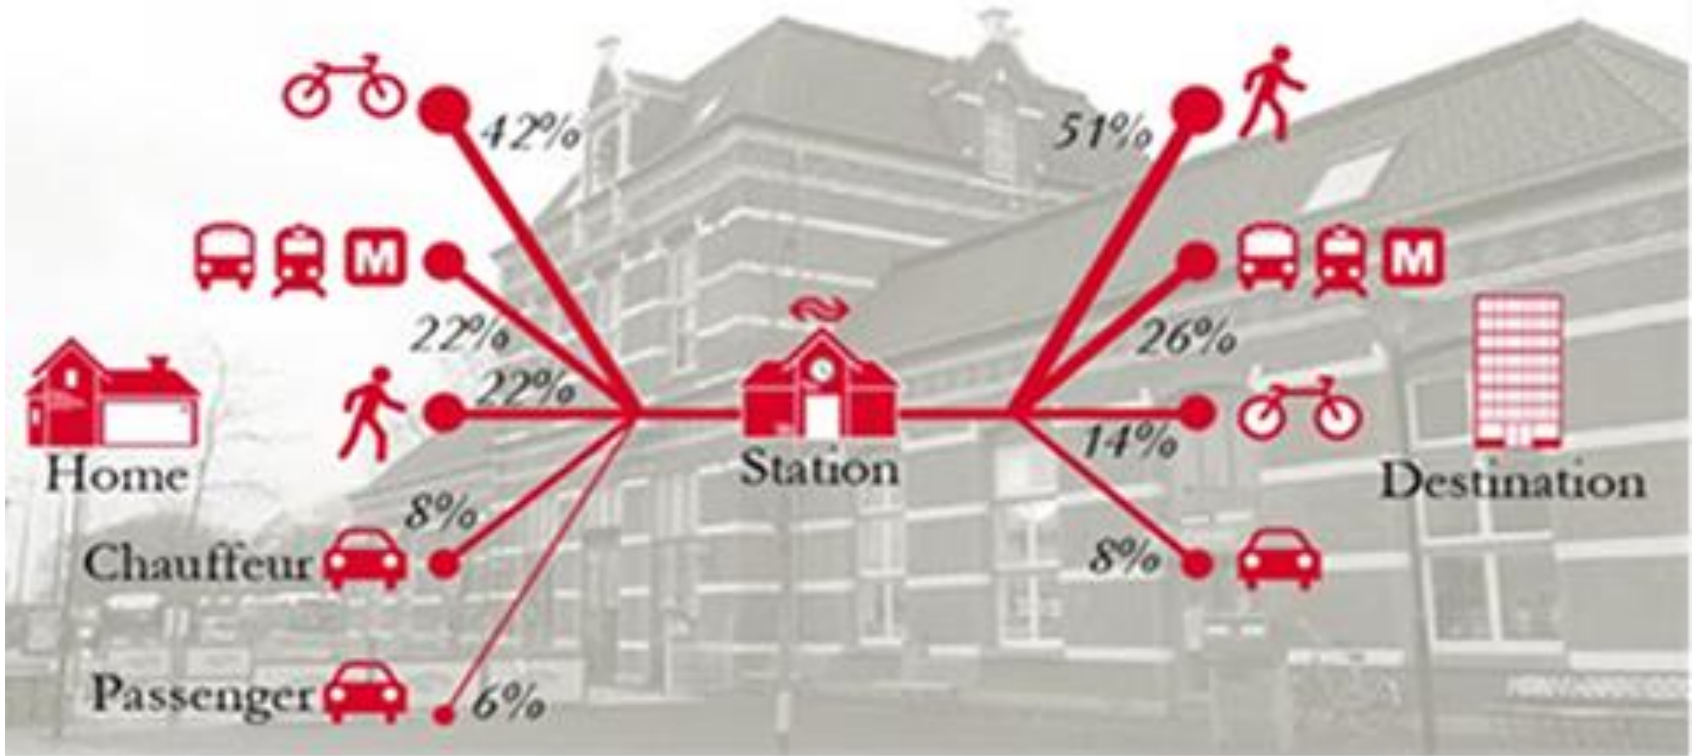

With Enterprise Car Club you reserve the car you need from where you want it, and it'll be there waiting for you. It's so easy - just swipe your membership card over the sticker in the windscreen, use the app - and your car will unlock. The keys will be in the car, and it'll give you the keys. And away you go. When you're done, just park it back where you reserved it.

FEEDBACK

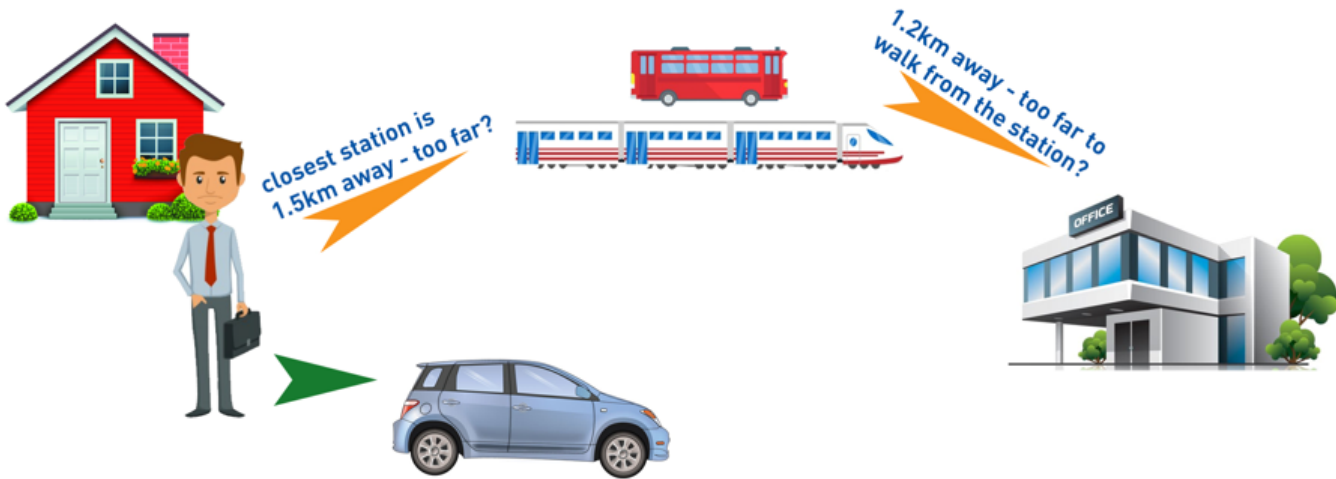

...why? Abelio

- 🔄 *Environmental* – reduce car dependency
- 🔄 *Commercial* - capture new markets

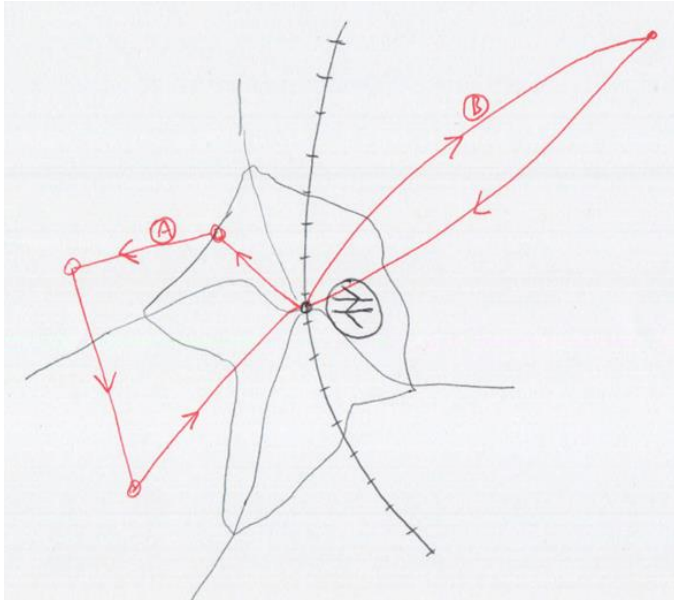

...why? Nextbike

- 🌱 *Environmental* – reduce car dependency
- 🌱 *Commercial* - capture new markets

...why? Use case

People x (journey) purpose x place (local context)

- 🔄 As part of a rail corridor scheme
- 🔄 Door-to-door journeys possible using rail and carsharing...
- 🔄 ... where use case makes carsharing appropriate

- 🔄 As part of a town/city carsharing scheme
- 🔄 Rail station / Park & ride is an easy-to-access hub from local areas
- 🔄 Main function (trains) is less relevant

Barriers

- 🔗 On-demand + scheduled services integration?
- 🔗 Parking bays
 - 🔗 Physical space?
 - 🔗 Lost parking revenue?
- 🔗 Potential scale of market vs space demands & whole-journey efficiency

Use cases

- 🔗 ITSO investment legacy
- 🔗 “MaaS will solve it”
- 🔗 What *are* the use cases anyway?

Opportunities

Higher level aggregation

Citymapper, Google maps

Car sharing + other local services

e.g. ebike share, e.g Uber; Enterprise + Stagecoach

MaaS

Conclusions

🌐 Why is integration a good thing?

Use cases?

🌐 Five levels of integration

🌐 “Soft integration” (with existing car sharing)

- more use in delivering public benefit?
- faster and cheaper to implement

🌐 *Who needs to do what in order to ensure that we see the public benefit of integration?*
