# ORRAP

Optimal recycling of reclaimed asphalt pavement

01/11/2016 - 31/12/2020

Recyclage optimal des agrégats de béton bitumineux dans les chaussées à faible trafic

*Optimales Recycling von Ausbauasphalt auf verkehrsschwachen Straßen*

**FINAL ANNUAL MEETING** 02/12/2020

Coordinator : C. Chazallon

- The ORRAP project is supported by the INTERREG Upper Rhine program from the ERDF (European Regional Development Fund) to the tune of **622 553€** and by the **Swiss Confederation, Canton Basel-Landschaft Canton Aargau**.
- ORRAP started in November 2016 with a total budget of 1.48 M€.
- It lasts : 50 months

## • Objectives

- New RAP recycling strategy
  - To achieve an optimum formulation of the granular mixtures made of RAP which can be used in a **base layer with their own self-binding properties**, taking into account the **mechanical, thermal** and **hydraulic** properties of the mixture.
  - RAP from recycling centers (homogeneous or non-homogeneous (mixtures), containing PAHs or not)
- Assessment of economic and environmental impact
  - The implementation of this technique in our regions will be studied both from an **economic** and **environmental** point of view.
  - A **risk analysis** will be carried out.
- Provision of useful **recommendations** for practitioners with a technical guide.

## • Methods

**WP2- Study of the self-binding properties of RAP (design of a granular mixture)**  
**(~ 30 months)**

**CEREMA , EMPA, FHNW, HsKA, INSA**

**WP3- Economic and environmental studies : estimation of the deployment of this technique at the level of the Upper Rhine region (~ 11 months)**

**HsKA, CEREMA, FHNW, INSA**

**WP4- Full scale tests section and Final guide (best practice) (~ 12 months)**  
**CEREMA, EMPA, FHNW, HsKa, INSA and CD67, Kanton BL**
